## PROJECTS

### Fully Functional MERN-Stack Restaurant WebSite

React.js,Tailwind CSS,Node.js, Express.js,MongoDB

- Fully Functional Responsive MERN-Stack Restaurant WebSite using React.js,Tailwind CSS for frontend Node.js,Express.js,MongoDB for Backend.
- Features include seamless frontend-backend integration, Firebase authentication, JWT token access, admin panel,image hosting, and online food ordering
- Admin Dashboard: For restaurant owners and administrators, our comprehensive admin dashboard offers insights into order management, menu updates

### Full Functional E-commerce Website

JSX, CSS, ReactJS

- We will create the Home page where we will display the trending products, offer banner, newsletter subscription form, then we will make product page for men's category, women's category and kids category.
- After that we will make the single product page,then we will make the shopping cart page, that will display the product added in the cart
- We will also make the login register page where use can create an account or login to the Ecommerce website.

### Food App In React - Redux Toolkit

JSX, CSS, React JS - Redux

- This is basically a food delivery App made in react js and redux.
- user can search food and also can search by filter option.
- user can able to add food product into the cart and also can able to remove that specific product from cart.

### Responsive E-Commerce Store website

HTML-5,CSS-3, and Vanilla Javascript

- Responsive Design: Our website is designed to adapt seamlessly to different devices and screen sizes, on desktops, laptops, tablets, and smartphones.This Website Has Multipages With Beautiful And Responsive Design.
- Shopping Cart: Add desired items to the shopping cart for convenient checkout.
